

China Cylinder Gas High Purity Best Price Sf6 Sulfur Hexafluoride

Basic Information

Place of Origin: China
Brand Name: CMC
Certification: COA
Model Number: SF6
Minimum Order Quantity: 1kg

Price: US \$ 9.5/kg
Packaging Details: Cylinder/Tank
Delivery Time: 15 days
Payment Terms: L/C, T/T

• Supply Ability: 5000 Tons/Year

Product Specification

Product Name: Sulfur Hexafluoride
Valve: Qf-2, Cga590
Cylinder Pressure: 15MPa/20MPa
Cylinder Standard: GB/ISO/DOT
Melting Point: -50.8 °C
Boiling Point: -63.8 °C

Appearance: Colorless, Odorless
 Transport Package: Sea Transportation
 Specification: 40L, 47L, 50L, 500L Etc

• Trademark: CMC

Origin: Suzhou, China
 HS Code: 28129019
 Supply Ability: 5000tons/Year
 CAS No.: 2551-62-4
 Formula: Sf6

Product Description

Product Description

Sulfur hexafluoride (SF6) is a colorless, odorless, non-flammable, and non-toxic gas. It is commonly used as an electrical insulator in high-voltage electrical equipment, such as circuit breakers, switchgear, and transformers. SF6 has excellent electrical insulation properties, allowing it to withstand high electric fields without ionizing and losing its insulating capability.

Here are some key properties and applications of sulfur hexafluoride gas:

Insulating Properties: SF6 has a high dielectric strength, which means it can effectively prevent electrical discharges and breakdowns in high-voltage equipment. This property makes it suitable for use in electric power transmission and distribution systems.

Thermal Stability: SF6 is thermally stable and can withstand high temperatures without decomposing. This characteristic makes it useful in applications where equipment may experience elevated operating temperatures.

Inertness: SF6 is chemically inert and does not react with most substances. It remains stable under normal conditions, making it a reliable and long-lasting insulating material.

Density: SF6 is a dense gas with a higher density than air. This property allows it to be used in gas-insulated switchgear (GIS), where the gas is used to fill enclosed compartments, providing insulation and reducing the overall size of the equipment.

Medical Applications: SF6 has been used in medical imaging techniques, such as ultrasound contrast imaging and retinal detachment surgery. Its high density and low solubility in blood make it suitable for certain diagnostic and therapeutic procedures.

It's worth noting that while SF6 has many beneficial properties for electrical insulation, it is also considered a potent greenhouse gas with a high global warming potential. Efforts are being made to reduce its usage and find alternative insulating gases with lower environmental impact.

Basic Info

 DOT Class
 2.2
 Un Number
 Un 1080

 Cylinder Standard
 DOT/ISO/GB
 Cylinder Pressure
 15MPa/20MPa

 Valve
 Qf-2, Cga590
 Melting Point
 -50.8 °C

 Appearance
 Colorless, Odorless
 Boiling Point
 -63.8 °C

 Density
 6.0886 Kg/M³
 Molecular Weight
 146.05

 $\label{temport Package 40L, 47L, 50L, 500L Specification 99.995\%, 99.999\%} Transport Package 40L, 47L, 50L, 500L Specification 99.995\%, 99.999\%$

Trademark CMC Origin China
HS Code 28129019 Production Capacity 5000tons/Year

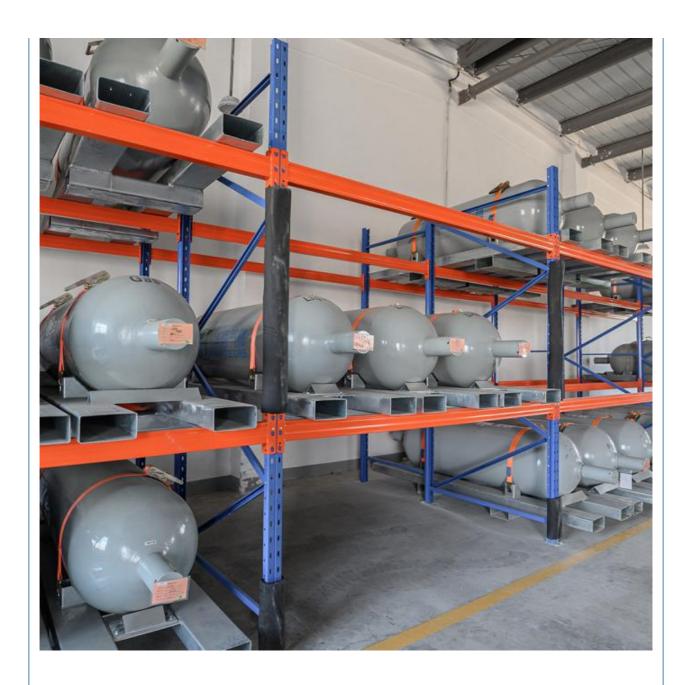

Specifications

Specifications	Company Standard
SF6	≥ 99.995%
Air	≤ 10 ppm
CF4	≤ 2 ppm
C2F6	≤ 20 ppm
C3F8	≤ 5 ppm
Low Sulfide	Not Detected
H2O	≤ 1 ppm
Acidity as HF	≤ 0.1 ppm
Hydrolysable Fluor ides as HF	≤ 0.3 ppm
Mineral Oil	≤ 1 ppm

Company

Profile

Shanghai Kemike Chemical Co., Ltd is staffed by trained personnel, combine many years experience in Gas industry .We supply cylinder gas, electronic gas, etc., and the gas holder, panel, valves and fittings and other equipment, parts and engineering services to our customers in China and worldwide; The products are involved in various industrial fields, such as

semiconductor chip, solar cell, LED, TFT-LCD, optical fiber, glass, laser, medicine, etc., Our mission is to partner with our global customers to provide support, solutions and quality products that are innovative, reliable, and safe. Our products mainly include: H2, O2, N2, Ar, CO2, propane, acetylene, helium, laser mixed gas, SiH4, Sih2cl2, SiHCL3, SiCL4, NH3, CF4, NF3, SF6, HCL, N2O, doping mixed gas (TMB, PH3, B2H6) and other electronic gases.
