

Semiconductor Manufacturing Cylinder Gas Tungsten Hexafluoride

Basic Information

. Place of Origin: China . Brand Name: CMC COA · Certification: Wf6 Model Number: • Minimum Order Quantity: 1 Piece • Price: US \$ 15/PC · Packaging Details: Cylinder/Tank • Delivery Time: 15 days Payment Terms: L/C, T/T . Supply Ability: 200 Tons/Year

Product Specification

Product Name: Tungsten Hexafluoride

• Appearance: Colorless China • Orign: • Purity: 99.999% • Transport: By Sea • Transport Package: 10L/15kg Specification: 10L/15kg CMC Trademark: · Origin: China . HS Code: 2812190091 • Supply Ability: 200t/Year • CAS No.: 7783-82-6 Formula: Wf6 • EINECS: 232-029-1 Constituent: Industrial Pure Air

Product Description

Product Description

WF6 refers to tungsten hexafluoride, which is a chemical compound composed of one tungsten atom bonded to six fluorine atoms. Here are some key points about WF6:

Chemical Formula: WF6

Molecular Weight: 297.85 g/mol

Structure:tungsten hexafluoride has an octahedral molecular geometry, with the tungsten atom at the center and six fluorine atoms arranged around it.

Physical Properties: Tungsten hexafluoride is a yellowish-green gas at room temperature. It has a strong, pungent odor and is highly reactive.

Chemical Reactivity: Tungsten hexafluoride is a highly reactive compound, especially with water and moisture. It hydrolyzes rapidly in the presence of water, releasing hydrofluoric acid (HF) and tungstic acid (H2WO4). The hydrofluoric acid produced is highly corrosive and toxic.

Uses: Tungsten hexafluoride is primarily used in the semiconductor industry as a precursor for deposition of tungsten films during the fabrication of integrated circuits. It is also used in the production of tungsten metal and other tungsten compounds.

Safety Considerations: Tungsten hexafluoride is a hazardous compound due to its reactivity and the production of hydrofluoric acid upon contact with water or moisture. It is corrosive to many materials and can cause severe burns and tissue damage upon skin contact. Special care must be taken when handling, storing, and transporting WF6, and appropriate safety protocols must be followed.

Environmental Impact: Tungsten hexafluoride is not considered a significant environmental pollutant. However, its hydrolysis products, such as hydrofluoric acid, can be harmful to the environment and must be handled and disposed of properly.

Regulations: The use and handling of tungsten hexafluoride are subject to regulations and safety protocols to ensure the protection of workers and the environment. Regulatory bodies provide guidelines for the safe handling and disposal of WF6 and its byproducts.

Product Spec:

Tungsten Hexafluoride WF6 GAS

CAS No.: 7783-82-6 EINECS No.: 232-029-1 UN No.: UN2196 Purity: 99.999% Dot Class: 2.3

Appearance: Colorless

Grade Standard: Electron Grade, Industrial Grade

Company Profile

Shanghai Kemike Chemical Co., Ltd is staffed by trained personnel, combine many years experience in Gas industry .We supply cylinder gas, electronic gas, etc., and the gas holder, panel, valves and fittings and other equipment, parts and engineering services to our customers in China and worldwide; The products are involved in various industrial fields, such as semiconductor chip, solar cell, LED, TFT-LCD, optical fiber, glass, laser, medicine, etc., Our mission is to partner with our global customers to provide support, solutions and quality products that are innovative, reliable, and safe.

Our products mainly include: H2, O2, N2, Ar, CO2, propane, acetylene, helium, laser mixed gas, SiH4, Sih2cl2, SiHCL3, SiCL4, NH3, CF4, NF3, SF6, HCL, N2O, doping mixed gas (TMB, PH3, B2H6) and other electronic gases.
